Patient Information

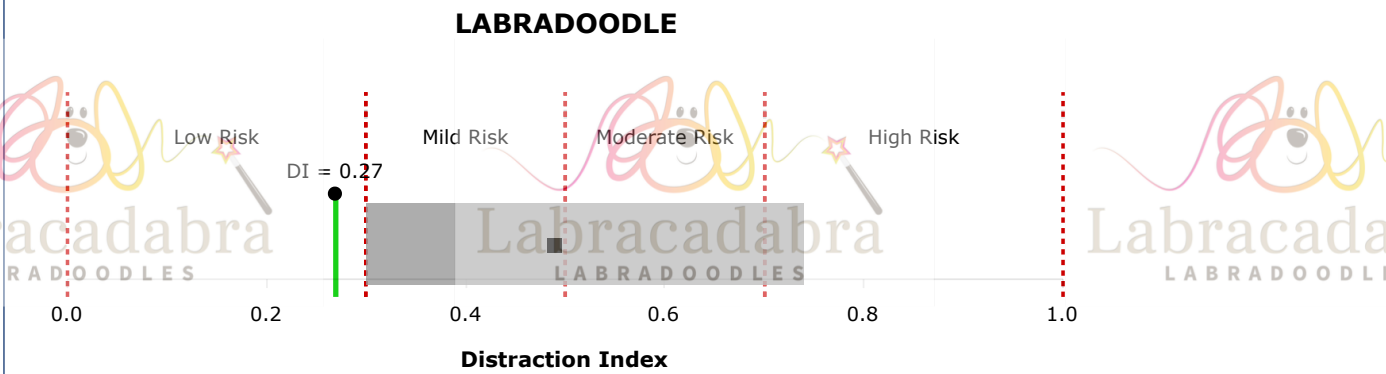

| | |
|---|--|
| Client: Ms Leiper, Jess Patient Name: George Reg. Name: PennHIP Num: 185122 Species: Canine Date of Birth: 14 Feb 2022 Sex: Male Date of Study: 15 Feb 2023 Date of Report: 16 Feb 2023 | Tattoo Num: Patient ID: 235557 Registration Num: Microchip Num: 953010100465108 Breed: LABRADOODLE Age: 12 months Weight: 54.5 lbs/24.7 kgs Date Submitted: 16 Feb 2023 |
|---|--|

Findings

Distraction Index (DI): Right DI = 0.27, Left DI = 0.26.
 Osteoarthritis (OA): No radiographic evidence of OA for either hip.
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.27.
 OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 11883 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.30 - 0.74) for the breed. The breed average DI is 0.49 (solid square). The patient DI is the solid circle (0.27).

SUMMARY: The degree of laxity (DI = 0.27) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.
